

AF-WELD™ HT

High temperature anti-spatter solution

AF-Weld™ HT is a unique, high performing anti-spatter solution that protects workpieces from the adherence of high energy spatter, such as spatter produced while welding stainless steel or as a result of plasma or laser cutting. This helps to reduce or even eliminate costly spatter removal operations.

Features & benefits:

- Ideal for pre-heated workpieces, multiple pass, thin sheet, and stainless steel welding
- Multi-functional product, can be used as a degreaser to prepare surfaces prior to welding
- No additional steps required in paint preparation
- VOC free, solvent free, silicone free, and biodegradable
- Odourless

Description	Size		Order No.	SDS
	Metric	Imperial		
Bag-in-box	10 L	2.6 gal	57-F 055	L-136E
Drum	208 L	55 gal	57-F 058	L-136E
