

AIR FORCE™ PL

The Air Force™ PL refillable spray system gives you the best of both worlds: the convenience of aerosols and the safety & cost effectiveness of non-aerosol dispensers.

- Lower operating costs (uses bulk product)
- No more cans to dispose of, no disposal fees
- No hazardous or ozone depleting propellant, only 100% active ingredient!

REFILLABLE AIR FORCE™ PL SPRAYER

The easy-to-use Air Force™ PL system consists of a sturdy, lightweight aluminum sprayer, which can be re-filled hundreds of times. Compressed air serves as the propellant.

The durable Air Force™ PL refillable sprayers come with a product specific label to clearly identify their contents and ensure full WHMIS compliance. Spray tips and valves can be easily replaced without tools.

AIR FORCE PL AUTOMATIC FILLING STATION

The Air Force™ PL Automatic filling station is convenient, safe and easy to use.

Just place the Air Force™ PL refillable sprayer onto the filling station to fill it with liquid and compressed air in one fast step. No need to handle the liquid. The station is connected to a compressed air line and a cost effective bulk container of Walter's high performance cleaner/degreaser AF-PL™.

SPECIFICATIONS:

Air Force™ refillable sprayer:

- Fill capacity: 400 ml
- Maximum pressure: 150 psi (10 bar)
