

HIGH PERFORMANCE CLEANING SOLUTIONS

WALTER
Surface Technologies

Only the best.™

Walter Surface Technologies offers high-performance cleaning solutions that get the job done faster and safer because they help you work better.

Large industrial production and maintenance facilities with demanding cleaning requirements benefit from our powerful, reliable, and certified products. For even the most heavy-duty applications, Walter provides safe and efficient alternatives to toxic solvents.

The ability to satisfy specific, high-volume surface treatment and cleaning needs, makes Walter the ideal partner for all manufacturing process applications. For all cleaning requirements, at any stage of production, we can reduce toxicity and help maximize your overall productivity.

No matter how stringent your cleaning requirements, we can provide the perfect custom solution - to improve working conditions, reduce waste, protect the environment, and maximize productivity. Refer to our selection chart for quick tips on choosing the right cleaner to get the job done.

LIQUIDS AVAILABLE SIZES

Our liquid cleaning and degreasing solutions come in a wide range of sizes and formats to suit your needs. From small, no-drip, continuous spray mist bottles to bulk barrels or totes, Walter's got you covered.

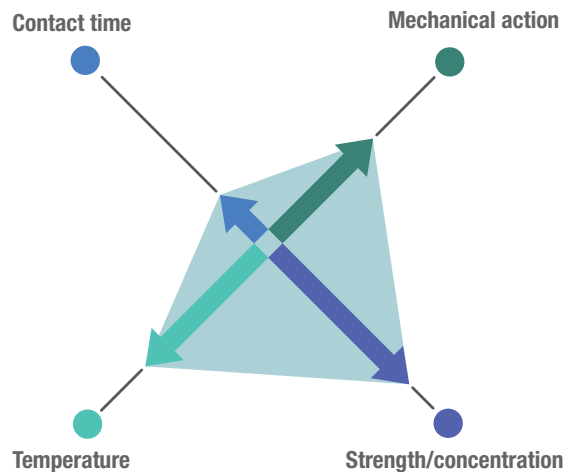

THE CLEANING MATRIX

Increase any of these four elements and increase the performance of your product!

4
key elements
to cleaning efficiency

- Contact time
- Mechanical action
- Temperature
- Strength/concentration

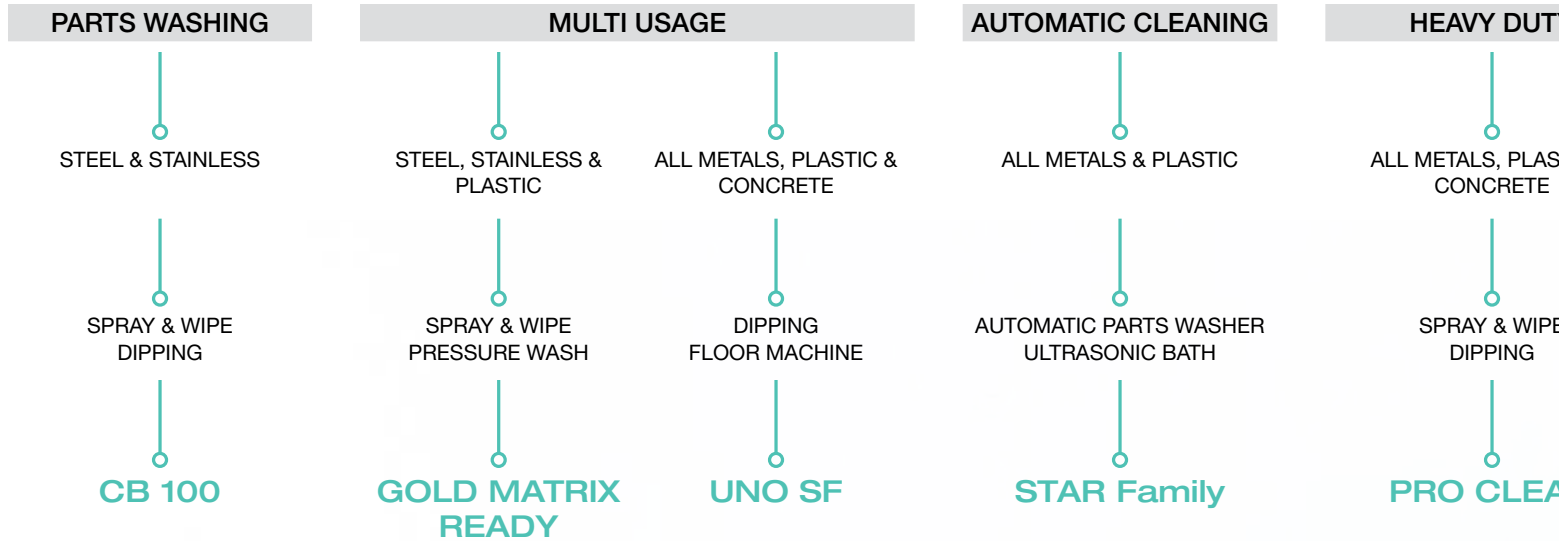

WHAT ARE YOU CLEANING?

OIL AND GREASE

BITUMEN, HEAVY GREASE,
CRUDE OIL, BAKED ON
ORGANIC CONTAMINANTS

WALTER ENVIRONMENTAL PRODUCTS - LEGEND

Accepted for use in food plants

Products with this logo presented are accepted for use in food plants within Canadian borders.

Volatile Organic Compounds Free

Consumers today are far more knowledgeable regarding products containing potentially toxic levels of volatile organic compounds, commonly known as VOCs. Paints, stains, and varnishes have long contributed considerably to the prolific release of VOCs, sometimes known as off-gassing. This explains the growing popularity of low-VOC and VOC-free products. Products where you see the VOC-free logo guarantee that they contain no volatile organic compounds.

Nonfood Compounds Program

The global food industry relies upon nonfood compounds to facilitate the efficient processing, handling and storage of food throughout the supply chain. Nonfood compounds include such substances as cleaners, sanitizers, boiler compounds and lubricants. NSF International Nonfood Compounds Registration Program provides beneficial product information to three important stakeholder groups.

Low Energy Surfactant (LES) technology

These unique surfactants can clean and degrease effectively at lower temperatures, thus generating substantial energy savings. Lower the temperature of your automated industrial parts washers today! NOTE: Dilution up to 1:200
